Cuttings Box

Introduction

Cuttings tank, also known as cuttings box, is used in offshore drilling to transport waste drilling fluid and cuttings to shore. Limited by crane loads, it provides easy collection and transport.

Advantages of TR Cuttings Box

Located near solid control equipment for convenient loading, full boxes are replaced with empty ones timely. Full boxes are shipped ashore by supply vessel, which returns with empty boxes.

Cuttings Tank Specifications

- Cuttings boxes come in two sizes: 25 bbl and 15 bbl.
 - A full 25 bbl box weighs up to 15 tons, especially with high-density drilling fluid.
 - The 15 bbl model is designed for cranes with limited lifting capacity, weighing 7-10 tons when full. Empty boxes can be stacked, but full ones cannot. For large-scale projects, over 3 sets of 25-30 boxes
- Tank Dimensions2130*1234*1202.5mmTank Weight900kgWorking Load8000kgTank Volume2.3m³Tank MaterialTank body: marine steel plate Hinges, pins, clamps and supports: 316 stainless steel
