Derrick Angle Adjustment Assembly

Derrick Rubber Spring

Derrick rubber spring assembly 1129-00 is a specialized component designed for oilfield shale shakers. As a key connection between the shaker basket and base, it provides vibration damping and structural stability under heavy loads.

This composite spring features a steel inner spring and rubber outer layer with high tensile strength. Model 1129-00 is widely used and can replace rubber springs for FLC503/504 shakers.

Features

- Extend equipment life
- Reduce stress on shaker parts and structure
- Maintain stable screen tension
- Lower noise and vibration

Derrick Rubber Spring

Xi'an Tianrui Petroleum Machinery Equipment Co., Ltd., established in 2010, is a modern manufacturer of solids control equipment certified to both API Q1 and ISO 9001 standards.
